

Step 1

Step 2

Step 3

Step 4

Step 5

Step 6

Pass the short end of the wrist strap through the elastic loop from the top and fold under. The free end should rest against your hand when worn.

Removing the wrist straps is simply the reverse of the installation.

*Note this strap should be reversed, for users who deploy their main canopy with their left hand, so that it may be worn on their right hand, wearing this housing or any other on your pull hand should be avoided, as it presents a snag hazard.
